

AMENDMENTS TO THE CLAIMS

This Listing of Claims will replace all prior versions, and listings of claims in the Application:

LISTING OF CLAIMS:

Claim 1 (Currently amended) A night vision device to mark the location of a front sight comprising:

a casing, the casing including a tube having opposing first and second ends and a switch set disposed at the first end of the tube;

a power source [[.]] disposed in the tube; and

a light emission device ~~adapted to the front sight having~~ disposed at the first end of the tube, the switch set controlling electrical coupling of the light emission device to the power source; and,

an optical fiber light conductor located on having one end disposed at the front sight and an opposing end coupled to a front end of the light emission device to conduct the light emitted by the light emission device to the front sight [[;]] wherein, the casing includes a tube and a switch set, the tube containing the power source connected to the light emission device; and the switch set controls conduction to the light emission device to mark by the light emitted from the light emission device the location of the front sight during night hours or where the visual contact is poor.

Claims 2-6 (Cancelled).

Claim 7 (Currently amended) The night vision device to mark the location of a front sight as claimed in Claim [[2]] 1, ~~wherein, the light conductor is an optical fiber wrapped up with~~ further comprising a protection tube through which the optical fiber light conductor extends.

Claim 8 (Currently amended) A night vision device to mark the location of a front sight as claimed in Claim 7, wherein, the protection tube ~~wrapping up the optical fiber of the conductor is comprised of~~ includes a flexible section connected to a rigid section, the flexible section being coupled to the light emission device.
